

Numab Therapeutics AG is an expanding, clinical stage Swiss biotech company based in Wädenswil, canton of Zürich. The company is focused on the discovery and development of innovative, antibody fragment-based therapeutics with a focus on immuno-oncology. With our breakthrough antibody-discovery and multi-specifics engineering platform, we engage in proprietary projects as well as collaborative research on behalf of partners in the pharmaceutical industry.

To develop Numab's growing proprietary therapeutic pipeline we are looking for a highly motivated and experienced individual for a role as Research Associate within our Cell Biology / Discovery team.

Research Associate Cell Biology 100%

In this position, you will be involved in activities related to the pharmacological characterization of innovative antibody fragment-based lead molecules. You will be responsible for designing, executing and analyzing cellular assays to characterize antibodies and antibody-fragment based mono- and multi-specific therapeutic molecules.

Your responsibilities

- Develop and perform cellular assays (e.g. reporter gene assays, flow cytometry-based assays, proliferation assays, assays using primary cells, etc.) to screen and characterize antibodies
- Generation of high quality data in cellular assay systems to enable the progressing of Numab's discovery projects
- Work closely with team members to outline next steps and help to drive the projects to completion
- Present your data within team meetings and company presentations

Your profile should ideally include:

- Master's degree or a Bachelor's degree in biology or related fields, preferably with industry experience in the field of drug discovery
- Expert knowledge in cell-based assays for the characterization of therapeutic antibodies
- Hands on expertise in flow cytometry would be a plus
- Experience in handling of primary cells would be a plus
- Highly accurate and team-oriented working style paired with a high sense of quality and the ability to work independently on diverse challenges
- Refined computer user skills (e.g. MS Office package, GraphPad prism, FlowJo, etc.) and communication skills

Are you looking for an inspiring, entrepreneurial atmosphere and want to be part of a dynamic team where your contributions are both essential and valued? We are looking for skilled people who are eager to make an impact. We are offering a permanent position in an innovative environment as well as a competitive compensation package including a participation in the company.

We are looking forward to receiving your application, in either English or German, with reference number NB073 to hr@numab.com.
